

Inv. no. 15/1986

JUG, PARCEL-GILT SILVER, EMBOSSED, ENGRAVED, AND PUNCHED, WITH A CAST HANDLE

OTTOMAN EMPIRE; C. 1550

H: 11.8 CM

The form and dragon handle of this jug make it resemble Timurid models from the 15th century. The decoration's spiral stems resemble the ones found on *tughras* on Ottoman *firman*s and on the group of Iznik pottery called Golden Horn, or *tughrakes* type.

Written sources describe how jugs made of precious metal were chained to the many drinking fountains in the palaces. A jug like this one may have served such a purpose. Not many objects of gold and silver from the 16th century have been preserved; innumerable wars often required sacrifices in art as well.
